## Game Description

Midnight Files is an immersive 1980s-inspired detective investigation game set in the neon-lit shadows of Midnight City. Crafted single-handedly by a passionate indie creator from Poland, it lets you step into the role of a skilled detective hunting a serial killer: explore crime scenes, collect evidence, photograph clues, interrogate suspects, connect facts on your detective board, identify the culprit, and predict the next crime location - all at your own pace.

The game emphasizes authentic detective work, logical deduction, and atmospheric storytelling, challenging players to think like real investigators in a gripping narrative with standalone cases.
