

## Midnight Files 2025 Development Plan

This roadmap covers the rest of 2025. The latest demo improvements are already available. Next we plan to add a new case by the end of November. In December we will release an expansion that takes the investigation beyond the city. We will keep improving performance and quality of life. Steam Deck support is targeted for the end of the year.

### November 2025

#### **New Case (target: end of month)**

A full investigation will join the core game. It deepens the detective loop with fresh evidence trails and flexible pacing. The new case fits naturally into the existing structure.

### December 2025

#### **Expansion: Beyond Midnight City**

The expansion moves the action outside the city. You drive a car that works as a mobile headquarters. You verify leads from an in-car database while you travel. You visit several crime scenes, connect clues, find where the suspect is hiding, and make the arrest yourself. The expansion adds a new investigation style and keeps the careful problem solving that defines the series.

#### **Key Features:**

- Partially open map with several investigation sites
- Drivable vehicle that serves as a mobile HQ
- In-car database for on the fly verification
- Crime scene work that reveals the suspect location
- Player led pursuit and arrest
- A new investigation mode that complements core cases

### Ongoing Improvements (Q4 2025)

- Steam Deck support and verification targeted for year end
- Continuous bug fixes, performance work, and quality of life updates
- Potential additional languages based on demand
